

CURRICULUM VITAE – TODD COLIN PATAKY

CONTACT INFORMATION

Kyoto University Graduate School of Medicine
Department of Human Health Sciences
53 Kawahara-cho, Shogoin, Sakyo-ku, Kyoto
Japan 606-8507

office: (phone number not yet available)
e-mail: pataky.todd.2m@kyoto-u.ac.jp
web: www.tpataky.net

I am an Associate Professor in the Department of Human Health Sciences at Kyoto University. My research focuses on the analysis and simulation of random processes in biomechanical systems. I am especially interested in developing methods for objectively analyzing and visualizing spatiotemporally complex human movement.

RESEARCH INTERESTS

Probabilistic biomechanics, Computational biomechanics, Statistical parametric mapping, Random field theory, Stochastic simulation, Finite element analysis, Computational statistics, Open source software development

EMPLOYMENT

Associate Professor Department of Human Health Sciences Kyoto University Graduate School of Medicine, Japan	2017-
Research Associate Professor Department of Bioengineering Institute for Fiber Engineering, Shinshu University, Japan	2013-2017
Assistant Professor , Research Tenure Track Department of Bioengineering, Shinshu University, Japan	2009-2013
Postdoctoral Research Associate School of Biomedical Sciences, University of Liverpool, UK	2006-2009
Postdoctoral Research Fellow Department of Cognitive Neuroscience, ATR Research, Kyoto, Japan	2004-2006

EDUCATION

Ph.D. , Department of Kinesiology, The Pennsylvania State University, USA Minor: Mechanical Engineering	2001-2004
M.S. , Department of Kinesiology, The Pennsylvania State University, USA	1999-2001
B.Sc.(Hons) , Department of Kinesiology, University of Western Ontario, Canada Minor: Mathematics	1995-1999

LANGUAGES

English, Japanese

HONORS AND AWARDS	Academic Visitor (GBP £3,000)	2017
	“Statistical Parametric Mapping in Biomechanics” Institute for Mathematical Innovation, University of Bath, UK.	
	William Evans Fellow (NZD \$6,850)	2014
	“Implementing advanced statistics for biomechanics research” University of Otago, New Zealand	
	Young Investigator Award (bronze) (SGD \$400)	2010
	“Topological statistics for probabilistic finite element simulations”. 6th World Congress on Biomechanics, Singapore.	
	Nike Award for Athletic Footwear Research (USD \$25,000)	2009
	D’Août K, Pataky TC , De Clercq D, Aerts P. “The effects of habitual footwear use: foot shape and function in native barefoot walkers” 9th International Footwear Biomechanics Symposium, Stellenbosch, South Africa.	
COMPETITIVE GRANTS (PI)	JSPS Scientific Research B (JPY ¥17,940,000)	2017–2020
	“Testing the validity of coordinate-dependent analysis of human movement and developing a coordinate-free alternative method”	
	JSPS Young Researcher Grant (Wakate A) (JPY ¥17,290,000)	2015–2017
	“Using neuroimaging statistics to model randomness in complex biomechanical systems”	
	JSPS Challenging Exploratory Research Grant (JPY ¥3,770,000)	2015–2017
	“Development of a randomness training system to improve golf putting performance”	
	JSPS Young Researcher Grant (Wakate B) (JPY ¥3,880,000)	2010–2012
	“Development of biomechanical imaging techniques based on neuroimaging statistics”	
	Royal Society International Short Visit Grant (GBP £2474)	2009
	Department of Mechanical Engineering, University of Porto, Portugal	
COMPETITIVE GRANTS (Co-I)	International Strategic Partnership Fund (NZD \$86,250)	2014–2017
	“Combining novel sensors, computational modeling, advanced statistics and robots.” First author of nine on a grant to promote robotic assistive device research collaborations between New Zealand and Japan. Ref: INTNZJS-38379	
	Royal Society International Exchange Grant (GBP £11,850)	2014–2015
	“Hypothesis testing of bone loading via probabilistic finite element simulation” Joint-grant with Dr. Philip Cox of Hull-York Medical School. Ref: IE131030	
	Royal Society International Exchange Grant (GBP £12,000)	2012–2013
	“The role of foot pressure in directional control and turning” Joint-grant with Prof. Robin Crompton of the University of Liverpool, Ref: IE111097.	
INTERNAL GRANTS	University of Liverpool Proof of Concept Grant (GBP £41,500)	2011
	“Pedobarographic Statistical Mapping” Business development and software engineering towards commercialization.	
	University of Liverpool Reach Out Travel Grant (GBP £600)	2008
	To attend EMED Scientific Meeting, Dundee, Scotland	
CONSULTANCIES	Takahashi Industries (JPY ¥120,000).	2015
	Analysis of accelerometer data during human gait.	
	Nike Golf (USD \$35,000).	2012–2015
	Analysis of golfing biomechanics data.	
	Department of Electrical Engineering and Electronics, University of Liverpool	2011
	Gait sensor and energy harvester location optimization.	

INVITED TALKS (CONFERENCES)	Applications of continuum statistics [in Japanese]	2014.09.19
	Invited Lecture Society of Instrument and Control Engineers, Central Symposium Center for Science and Technology Advancement, Nagano, Japan	
	Analysis and application of foot pressure distribution data [in Japanese]	2011.11.19
	Keynote Lecture 6th Japanese Symposium on Biological Measurement Koriyama College of Applied Health, Japan	
	Functional biomechanical continuum analysis and applications	2010.10.22
Invited Lecture 6th International Conference on Technology and Medical Sciences University of Porto, Portugal		
Footprint-based gait reconstruction of the 3.75 Ma Laetoli hominin	2010.09.17	
Invited Lecture 2nd Congress of the International Foot and Ankle Biomechanics Community University of Washington, USA		
INVITED TALKS (OTHER)	Mysteries of human walking	2016.04.05
	Royal Society of New Zealand, Hawkes Bay Holt Planetarium	
	Statistical Parametric Mapping: bridging the gap between classical statistics and human locomotion datasets. Consortium for Human Locomotion Assessment Technology, AIST, Tokyo, Japan	2015.12.07
	Continuous human movement data analysis with statistical parametric mapping	2015.02.27
	School of Sport Science, Exercise and Health, University of Western Australia	
	Random field theory applications in biomechanics	2014.08.29
	School of Biomedical Sciences, University of Queensland, Australia	
	Valid statistics for scalar and vector trajectories and continua	2013.03.20
	Liverpool John Moores University, UK	
	Topological statistics for the analysis of biomechanical continua	2013.03.11
	Hull-York Medical School, York, UK	
	The importance of foot pressure: from evolution to energy harvesting	2012.04.17
	Institute of Sport, Exercise and Active Living Victoria University, Melbourne, Australia	
	Foot pressure imaging: analysis and applications	2011.03.24
	Kinesiology Department Graduate Colloquium The Pennsylvania State University, State College, USA	
Topological statistical analysis of plantar pressure images	2010.09.14	
Nike Sport Research Laboratory, Portland, USA		
Discrete vs. continuous analysis of n-dimensional biomechanical data	2010.10.19	
University of Salford, Manchester, UK		
Continuous analysis of continuous curves	2010.10.08	
Liverpool John Moore's University, Liverpool, UK		
Recent advances in plantar pressure imaging for animal applications	2009	
Royal Veterinary College, London, UK		
Pedobarographic statistical parametric mapping (pSPM)	2009	
Chemnitz University of Technology, Germany		
Gait simulation and pressure image processing in human evolution	2009	
University of Porto, Portugal.		

WORKSHOPS

Statistical Parametric Mapping for Biomechanics

1. Brisbane, Australia (invited conference workshop: ISB 2017) **2017.07**
2. Cologne, Germany (invited conference workshop: ISBS 2017) **2017.06**
3. University of Bath, UK **2017.01**
4. University of Leuven (KUL), Belgium **2016.10**
5. University of St. Andrews, Scotland **2016.07**
6. Liverpool John Moores University, UK **2016.03**
7. RSScan, Paal, Belgium **2016.01**
8. Liverpool John Moores University, UK **2015.06**
9. University of Leuven (KUL), Belgium **2015.03**
10. Ghent University, Belgium **2014.07**
11. University of Otago, New Zealand **2014.03**

PUBLICATION METRICS	Peer-reviewed journal articles:	65
	Total citations:	1,553
	h-index:	26
	i-10 index:	37

CONFERENCE
PAPERS

1. Pataky TC, Vanrenterghem J, Robinson MA (2017). Bayesian inverse kinematics: improved angular displacement estimates in rigid planar rotations. Presented at the 26th Congress of the International Society of Biomechanics, Brisbane, Australia.
2. Pataky TC, Lamb PF (2016.07.19) Development of a virtual random-physics putting training system. Presented at the 7th World Scientific Congress of Golf in St. Andrews, Scotland.
3. Pataky TC (2015.11.28) Objective analyses of vector trajectories using random field theory [in Japanese]. Presented at the 36th Symposium of the Society of Biomechanisms Japan, Ueda, Japan.
4. Castro MP, Pataky TC, Sole G, Vila-Boas JP (2015.05.07) Comparison of 3D ground reaction forces between genders using statistical parametric mapping. Presented at the 16th Congress of the Brazilian Society of Biomechanics, Florianopolis, Brazil.
5. Pataky TC, Vanrenterghem J, Robinson MA (2015.07.15) The probability of finding 0D statistical significance in 1D trajectory analysis. Presented at the 25th Congress of the International Society of Biomechanics, Glasgow, UK.
6. Pataky TC, Lafortune M (2015.07.09) Effects of footwear on driver clubhead speed in amateur golfers: Classical vs. Bayesian inference. Presented at the 12th Footwear Biomechanics Symposium, Liverpool, UK.
7. Sole G, Pataky TC, Tengman E, Hager CK (2015.04.02) Analysing 3D knee kinematics using statistical parametric mapping during stair descent 20 years post-ACL rupture with and without reconstruction, World Congress for Physical Therapy, Singapore.
8. Robinson MA, Donnelly CJ, Vanrenterghem J, Pataky TC (2015.03.19). Vector field statistical analysis reveals important insight into knee joint moments. ACL Research Retreat VII, University of North Carolina at Greensboro, USA. [not yet accepted]

9. Pataky TC, Ball KA (2014.09). Using vector field statistics to assess correlations between golfers' handicap indexes and center of pressure velocity trajectories during driver swings. Presented at the World Scientific Congress of Golf, Gold Coast, Australia.
10. Pataky TC, Kimura K (2014.09). Dynamic weight sharing during putting: correlation with face angle variability as a proxy for skill. Presented at the World Scientific Congress of Golf, Gold Coast, Australia.
11. Lamb PF, Pataky TC, Stockl M (2014.09). A dynamic time-continuous assessment of x-factor changes during forced adaptations of swing effort. Presented at the World Scientific Congress of Golf, Gold Coast, Australia.
12. Pataky TC, Tanaka H, Hashimoto M (2014.04.09). Quantifying degree of foot use impairment in hemiplegic gait using center-of-pressure trajectory vector difference integrals. Presented at the 4th Congress of the International Foot and Ankle Biomechanics Community, Busan, Korea. [2014.04.08-2014.04.11]
13. Pataky TC, Tanaka H, Hashimoto M (2013.11.23). [Method for evaluating quantifying gait impairment severity using vector continuum analysis of center of pressure trajectories] (in Japanese). Presented at the 40th Congress of the Japanese Society for Clinical Biomechanics, Kobe, Japan.
14. Pataky TC, Robinson MA, Vanrenterghem J (2013.08.06). Kinematic and force trajectory analysis using vector field statistics. Presented at the 24th Congress of the International Society of Biomechanics, Natal, Brazil.
15. Pataky TC, Tanaka H, Hashimoto M (2013.08.01). Accuracy of an over-the-counter instrumented shoe: maximum pressures during walking. Presented at the 11th Footwear Biomechanics Symposium, Natal, Brazil.
16. Pataky TC (2013.07.09). Relation between maximum plantar pressure distribution and club-head speed in amateur golfers. Presented at the 31st Conference of the International Society of Biomechanics in Sports, Taipei, Taiwan.
17. Nakamura K, Pataky TC (2012.11.17). Free-throw recognition using plantar pressure distribution analysis and machine learning [in Japanese]. Presented at the 2012 Sports and Human Dynamics Symposium of the Japanese Society for Mechanical Engineering, Toyohashi, Aichi, Japan.
18. Pataky TC (2012.09.16). Python in gait biomechanics research. Presented at Python Conference Japan 2012, Tokyo, Japan. <http://www.youtube.com/watch?v=tRYpdm-e5Ro&feature=plcp>
19. Pataky TC (2012.04.12). Spatial resolution and peak-pressure-change measurement accuracy. Presented at the 3rd Congress of the International Foot and Ankle Biomechanics Community, Sydney, Australia.
20. Rosenbaum D, Bosch K, Pataky TC (2012.02). When is the child's foot matured? Longitudinal investigation of foot loading patterns between 1 and 10 years. Presented at the 2012 Annual Main Meeting of the Orthopaedic Research Society, San Francisco, USA.
21. Pataky TC (2011.11.19) Analysis and applications of foot pressure distribution data (in Japanese). Keynote lecture presented at the 6th Japanese Biological Measurement Conference. Koriyama, Japan.
22. Pataky TC (2011.10.24). Foot pressure. Presented at the 2011 Prince Edward Island BioPartnering Conference, Charlottetown, Canada.
23. Pataky TC (2011.09.16). Postural compensation in hand pressure images. Presented at the 5th European Conference of the International Federation for Medical and Biological Engineering, Budapest, Hungary.
24. Pataky TC, Mu T, Bosch K, Rosenbaum D, Goulermas JY (2011.07). Highly accurate biometric identification of 104 subjects using plantar pressure data. Presented at the 23rd Congress of the International Society of Biomechanics, Brussels, Belgium.
25. Panagiotopoulou O, Pataky TC, Hutchinson J (2011.07). Regional plantar pressure distribution during walking in hoofed mammals. Presented at the 2011 Annual Main Meeting of the Society for Experimental Biology, Glasgow, Scotland.
26. Pataky TC (2011.06.30). Spatially continuous analysis of in-shoe pressure data. Presented at the 10th Footwear Biomechanics Symposium, Tübingen, Germany.

27. Rosenbaum D, Bosch K, Pataky TC (2011). [Der Reifungsprozess des kindlichen Fußes: Plantare Druckverteilungsmessungen im Altersverlauf zwischen 1 und 10 Jahren] The developing foot: plantar pressure measurements between 1 and 10 years. Presented at the 7th Annual Meeting of German Society of Biomechanics, Murnau, Germany.
28. Pataky TC (2010). Topological statistics for probabilistic finite element simulations. Presented at the 6th World Congress on Biomechanics, Singapore.
29. Pataky TC (2010). Functional biomechanical continuum analysis and applications. Presented at the 6th International Conference on Technology and Medical Sciences, Porto, Portugal.
30. Pataky TC, Maiwald C (2010). Spatiotemporal volumetric analysis of dynamic pedobarographic data. Presented at the 2nd Congress of the International Foot and Ankle Biomechanics Community, Seattle, USA.
31. Pataky TC (2010). Real-time statistical analysis of plantar pressure data: a preliminary feasibility study. Presented at the 2nd Congress of the International Foot and Ankle Biomechanics Community, Seattle, USA.
32. Caravaggi P, Pataky TC (2010). Experience and feedback from Liverpool University with RScan pressure plates. Presented at Pressure Measurement Devices Workshop, Istituto Superiore Di Santa, Rome, Italy.
33. Olivera FPM, Pataky TC, Tavares JMRS (2010). Registration of pedobarographic images. Presented at Computer Methods in Biomechanics and Biomedical Engineering 2010, Valencia, Spain.
34. Olivera FPM, Pataky TC, Tavares JMRS (2010). Registration of pedobarographic data sets in frequency domain. Presented at the 2010 Summer School and Workshop on Imaging Sciences and Medical Applications, University of Coimbra, Portugal.
35. D'Août K, Pataky TC, De Clercq D, Aerts P (2009). Footwear influences foot anatomy and plantar pressure distribution. Presented at the 2009 Symposium of the Flemish Society for Kinesiology, Leuven, Belgium.
36. Olivera FPM, Tavares JMRS, Pataky TC (2009). A versatile matching algorithm based on dynamic programming with circular order preserving. Presented at the 2nd ECCOMAS Thematic Conference on Computational Vision and Medical Image Processing (VIP Image), Porto, Portugal.
37. D'Août K, Pataky TC, De Clercq D, Aerts P (2009). The effects of habitual footwear use: foot shape and function in native barefoot walkers. Presented at 9th Biennial International Society of Biomechanics Footwear Biomechanics Symposium, Stellenbosch, South Africa.
Winner of 2009 Nike Award for Athletic Footwear Research (US\$25,000).
38. Segers V, Pataky TC, De Clercq D (2009). A comparison of barefoot walking and running on plantar pressure variables. Presented at 9th Biennial International Society of Biomechanics Footwear Biomechanics Symposium, Stellenbosch, South Africa.
39. Vanrenterghem J, Chambers S, Garcia R, Hawken M, Lake M, Pataky TC (2009). Combining a dynamic balance protocol and statistical parametric mapping to better understand floor pedobarography in shod dynamic sports activities. Presented at the 4th International State-of-the-Art Congress "Rehabilitation: Mobility, Exercise & Sports", Amsterdam, The Netherlands.
40. Pataky TC, Goulermas JY, Caravaggi P, Crompton RH (2008). New insights into stance phase foot biomechanics using pedobarographic statistical parametric mapping. *Journal of Foot and Ankle Research* 1 (Suppl.1): O25. Presented at International Foot and Ankle Biomechanics Congress, Bologna, Italy.
41. Caravaggi P, Pataky TC, Savage R, Crompton RH (2008). Evidence for early stance phase pre-loading of the plantar aponeurosis. *Journal of Foot and Ankle Research* 1 (Suppl.1): O42. Presented at International Foot and Ankle Biomechanics Congress, Bologna, Italy.
42. Pataky TC, Savage R, Sellers WI, Crompton RH (2008). Reconstruction of the Laetoli footprints as records of foot pressure. Presented at IPS Post-Congress Symposium on Comparative Functional Morphology in Primates, Durham, UK.

43. Pataky TC, Parker D, Goulermas JY, Crompton RH (2008). Assessing gait asymmetries using pedobarographic statistical parametric mapping. Presented at EMED Scientific Meeting, Dundee, Scotland.
44. Pataky TC, Crompton RH (2007). Footprint-based gait reconstruction: inverse computation of foot kinematics. *Journal of Biomechanical Science and Engineering* 2(Suppl.1): S51. Presented at Third Asian Pacific Conference on Biomechanics, Tokyo, Japan.
45. Caravaggi P, Pataky TC (2007). Toward footprint-based gait reconstruction. *Foot and Ankle Biomechanics*, Leuven, Belgium.
46. Pataky TC, Caravaggi P, Sellers BL, Crompton RH (2007). Are footprints records of peak pressure history? *Manchester Biomechanics Conference*, Manchester, UK.
47. Pataky TC, Osu R, Imamizu H, Kawato M (2006). Oculomotor vs. somatomotor encoding in human cortex. *Human Brain Mapping*, 12th Annual Meeting, Florence, Italy.
48. Pataky TC, Imamizu H, Osu R, Kawato M, Kamitani Y (2006). Oculomotor vs. somatomotor encoding in human cortex. *Mechanisms of Brain and Mind*, Hokkaido, Japan.
49. Pataky TC, Franklin DW, Kawato M, Milner TE (2005). A systematic study of the reflex responses in the isometrically loaded multijoint human arm. *Society for Neuroscience 35th Annual Meeting*, Washington, DC, USA.
50. Zatsiorsky VM, Pataky TC, Latash ML (2004). Numerical optimization of finger forces during manipulation of hand-held objects. *Computer Methods in Biomechanics & Biomechanical Engineering*, Madrid, Spain.
51. Pataky TC, Latash ML, Zatsiorsky VM (2003). Finger pad viscoelastic response to shear load: finite element model validation. *ASME*, Washington, DC, USA.
52. Pataky TC, Latash ML, Zatsiorsky VM (2003). Numerical optimization predicts human manipulation performance when rotating an object through the gravity field. *Digital Biology*, Bethesda, USA.
53. Zatsiorsky VM, Latash ML, Gregory RW, Gao F, Pataky TC, and Shim JK (2003). Control of prehension. *Progress in Motor Control-IV*, Caen, France.
54. Pataky TC, Latash ML, Zatsiorsky VM (2003). Optimum finger forces in pronated and supinated postures. *American Society of Biomechanics*, Toledo, USA.
55. Pataky TC, Latash ML, Zatsiorsky VM (2003). Finger pad viscoelasticity under tangential load (2003). *International Society of Biomechanics*, Dunedin, New Zealand.
56. Pataky TC, Latash ML, Zatsiorsky VM (2002). Load sharing among fingers during static five finger prehension. *World Congress for Biomechanics*, Calgary, Canada.
57. Pataky TC, Latash ML, Zatsiorsky VM (2001). Using a force plate to measure limb segment masses. *International Society for Biomechanics in Sport*, San Francisco, USA.

SOFTWARE
PROJECTS

SPM1D: one-dimensional statistical parametric mapping.

Open-source Python and MATLAB packages for statistical analysis of smooth 1D datasets.

<http://www.spm1d.org>

RFT1D: one-dimensional random field theory.

Open-source Python package for simulating smooth, random 1D continua and exploring predictions of random field theory.

<http://www.spm1d.org/rft1d>

MUN104: plantar pressure foot template.

Morphologically average plantar pressure profile of 104 individuals.

<http://www.tpataky.net/Datasets/mun104>
